— TEAM DAY

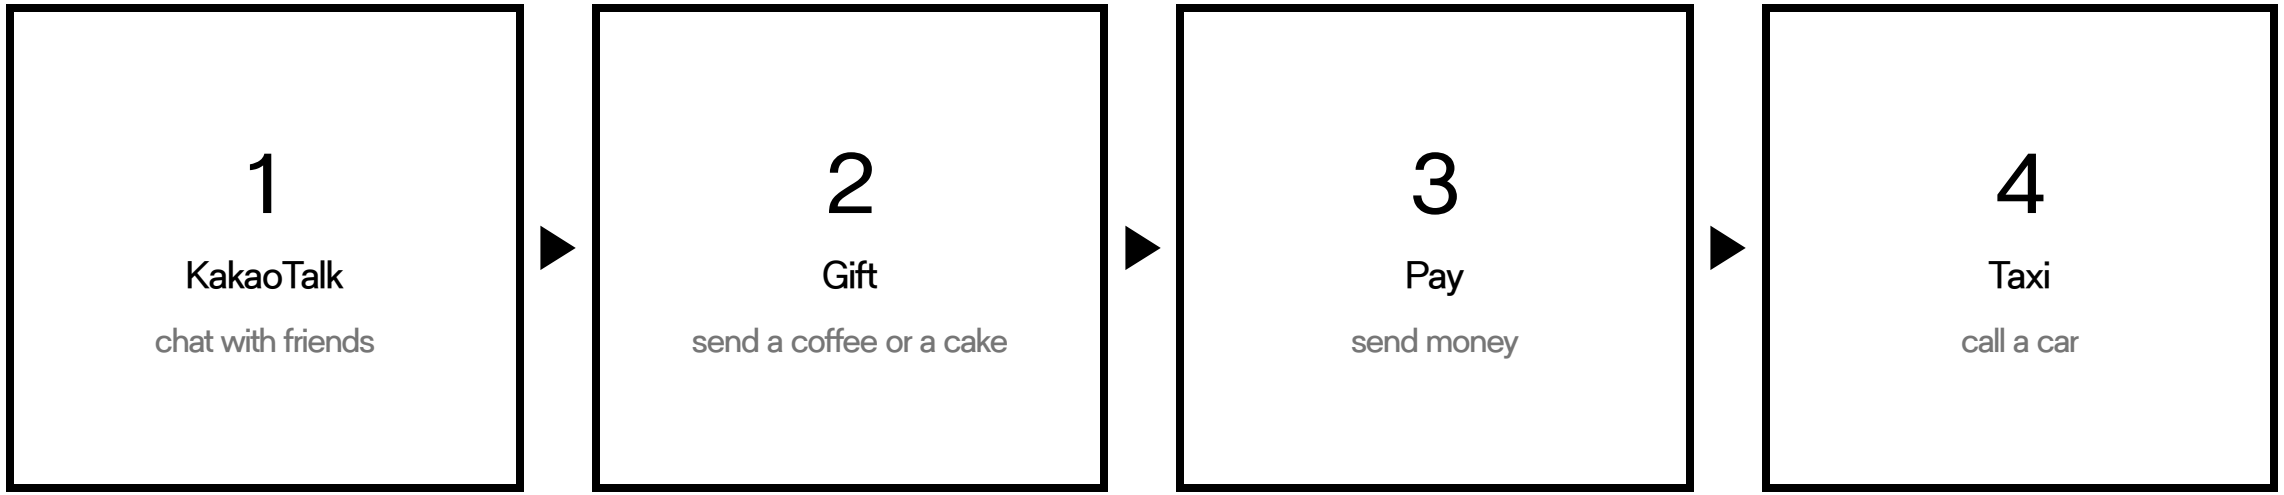

Week 11 · From one service to one super app

Today: a short talk, the wall, then teams. Submit online by 18:00.

Your work so far — and what comes next

Many services. One app. You never leave.

A super app = many services in one place. You do not switch apps.

Hands up

Who does NOT use Kakao?

That is fine. Just raise your hand.

Back home — which app is like this?

One app where you chat, pay, and order. What is it called?

One birthday, three services

People and money move from one service to the next. Each one brings customers to the others.

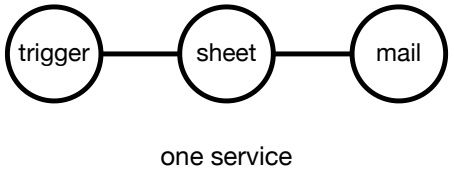

Why would a customer go on to the next service?

BY FUNCTION · Kakao	BY FEELING · MSCHF
The next service is useful right now. You sent a message — so you send a gift. One step leads to the next step.	Every drop is different, but they all feel the same: weird, funny, a little rule-breaking. People follow that feeling to the next drop.

Both are fine. In your super app picture, we draw the function side: what moves from one service to the next.

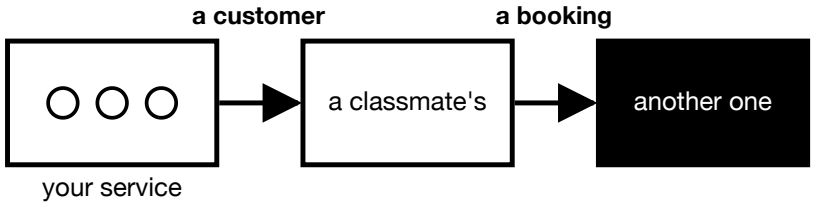

Same picture. Bigger boxes.

W10 · YOUR MAKE SCENARIO
modules joined by lines

one service

SUPER APP
services joined by arrows

your service

On each arrow, write only **what moves**: a customer · a booking · a coin · a review.

Your scenario becomes one module of a bigger app.

Three things, then submit

1

The wall · 12:50

scan the QR · "I like this idea because…" · 5 or more

▶

2

Team sheet · 13:45

one paper per team · hand it to the professor

▶

3

Talk with the AI assistant

each member · then submit online

Deadline today 18:00. Submitting = attendance. Mistakes are fine.

One paper per team

Write

Team name · the leader (name, student ID) · one line per member: name, student ID, your service in one line, signature · your super app in one line (a working name is fine) · date Nov 11.

Then

Hand the paper to the professor. Then each member talks with the AI assistant on our site and submits: team name, leader, your service in one line, your 5 feedbacks.

Working alone is fine

A team of one is a real team — you are your own leader.

Fill in the team sheet with your own name as the leader. You can connect with a classmate's service later, if you want.
