MSCHF — Small Weird Things That Move People

Three drops. Four boxes. Then your own idea.

Oct. 28, 2026 · Dooyoung Kwon · AI-based BPA — Automation in AI · Week 9

1. Have You Ever Needed 3 More Pages?

Your paper must be 15 pages.

You wrote 12. It is midnight.

What would you do?

2. MSCHF Had an Answer — a Font

1. It looks like Times New Roman.
2. Every letter is 5-10% wider.

Same pages, 13% fewer words.

3. Let′s Look at It in 4 Boxes

① Everyone knows this — a page rule

② One weird twist — a wider font

③ One small page — a font file

④ People moved — students downloaded it

Four boxes. We will use them again and again.

4. Who Is MSCHF?

An art collective in Brooklyn, New York

135 “drops” on its homepage — each one small and strange

Say it like “mischief.”

5. Meet Them — Two Interviews

Part 1 · 30 min

Part 2 · 18 min

1. Part 1 — how they think and work
2. Part 2 — how they run their group

Watch Part 1 from the start.

6. Second Drop — Key4All

1. September 2022 · New York
2. 1,000 keys. One car.

Anyone with a key can drive it.

7. Key4All in 4 Boxes

① Renting a car: book, pay, get a key

② Twist: 1,000 people hold the key to the same car

③ Small: a sign-up page and a key

④ 1,000 keys sold

You find the car, you drive it. Another key holder can take it from you.

8. Third Drop — The ATM That Ranks You

Art Basel, Miami Beach · 2022

A working ATM

It takes your photo and shows your bank balance on a big screen

A high-score board for money.

9. The ATM in 4 Boxes

① Everyone knows: your balance is private

② Twist: turn it into an arcade scoreboard

③ Small: one ATM, one screen

④ People really used it — the gallery said the withdrawals were real

Private money, public game.

10. The Same Pattern, Three Times

① A page rule · renting a car · private money

② A wider font · one car, 1,000 keys · a scoreboard

③ A font file · a sign-up page · one machine

④ Downloads · 1,000 keys · people at the screen

Different drops. Same four boxes.

11. Notice ① — They Start from a Rule

Pages. Rental cars. Bank balances.

A rule everyone knows, and nobody questions

The weird idea sits on top of a rule.

12. Notice ③ — They Are Small

A font file

A sign-up page

One machine

Small enough to finish in a week.

13. Notice ④ — People Do Something

Not just “ha ha.”

They download. They buy a key. They step up to the machine.

A good idea makes people move.

14. Your Turn — Your Own Idea

① What rule or annoyance does everyone around you know?

② What is your weird twist?

③ What is the smallest thing you could make?

④ What would people actually do?

Your own idea. Not a group's.

15. Where to Start

Twist the business idea you already have

Or something you really want to do

Or: what if you did it in Korea?

Start with a real scene: when, where, who.

16. Talk to the AI Assistant

1. Scan. Open Week 9. Sign in with your student ID and email.
2. Say hi. It will build the idea with you.

It is a senior planner. You decide.

17. Submit One Page

Deadline: today, Oct. 28, 6:00 pm

After 6:00 pm it is recorded as late

You can fix it and submit again in the same chat

Your idea is used in next week's activity.
