MSCHF: small, weird things that move people

Three drops. Four boxes. Then your own idea — not a group's.

E401, then the PC Lab · Prof. DY Kwon · SMIT E-BUSINESS

Look at three. Notice the pattern. Make your own.

One — three drops by MSCHF, each told in the same four boxes

Two — notice what they share: a rule, something small, people who move

Three — talk to the AI assistant and build one idea of your own

Your paper must be 15 pages. You wrote 12. It is midnight.

What would you do?

MSCHF made a font.

It looks like Times New Roman. Every letter is 5-10% wider.

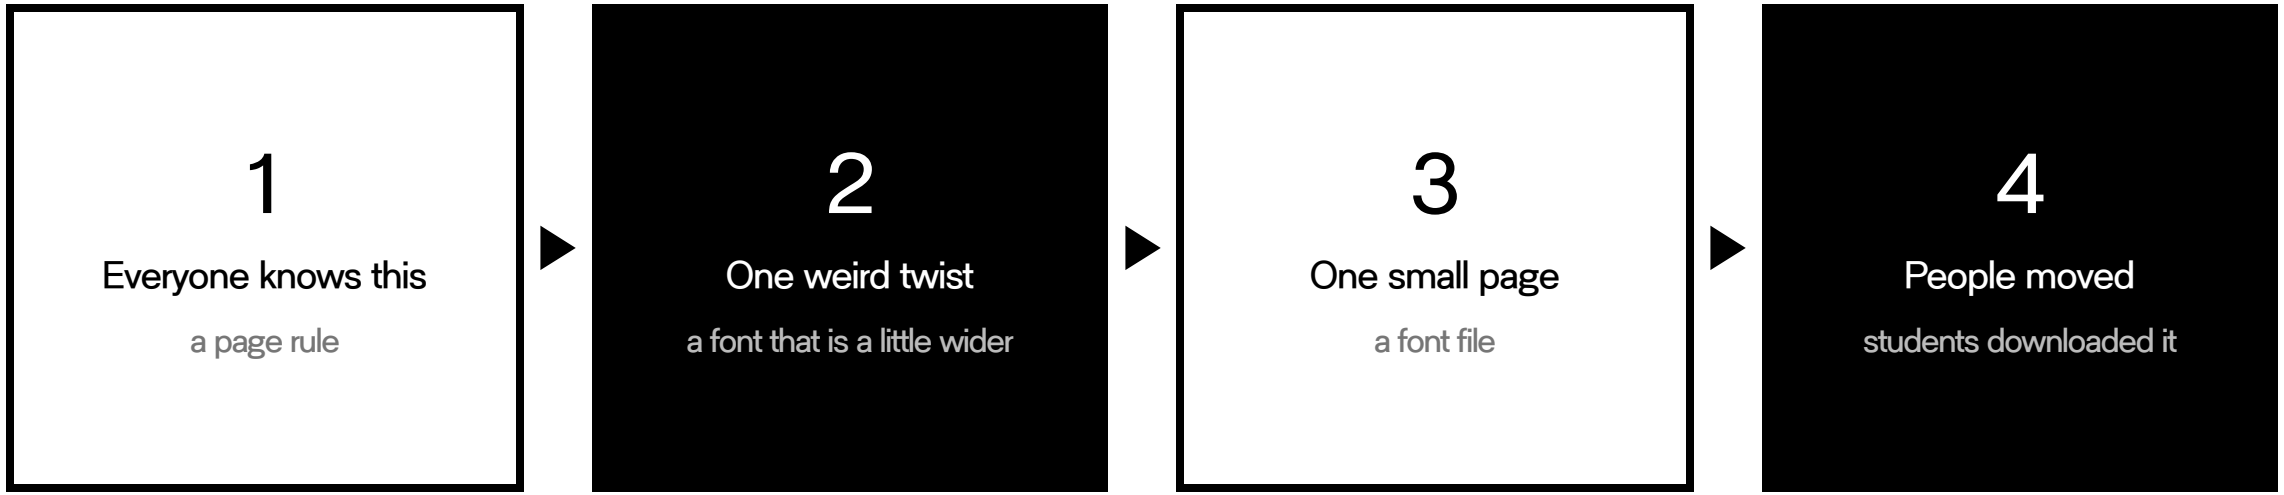

13%

fewer words for the same 15 pages

The site says a 15-page paper needs about 13% fewer words. Students downloaded the font file.

We will use the same four boxes again and again

An art collective in Brooklyn, New York. Say it like “mischief.”

135

“drops” on its homepage — each one small and strange

1

idea at a time

Two interviews — Part 1 first, from the start

Part 1 · 30 min
how they think and work

Part 2 · 18 min
how they run their group

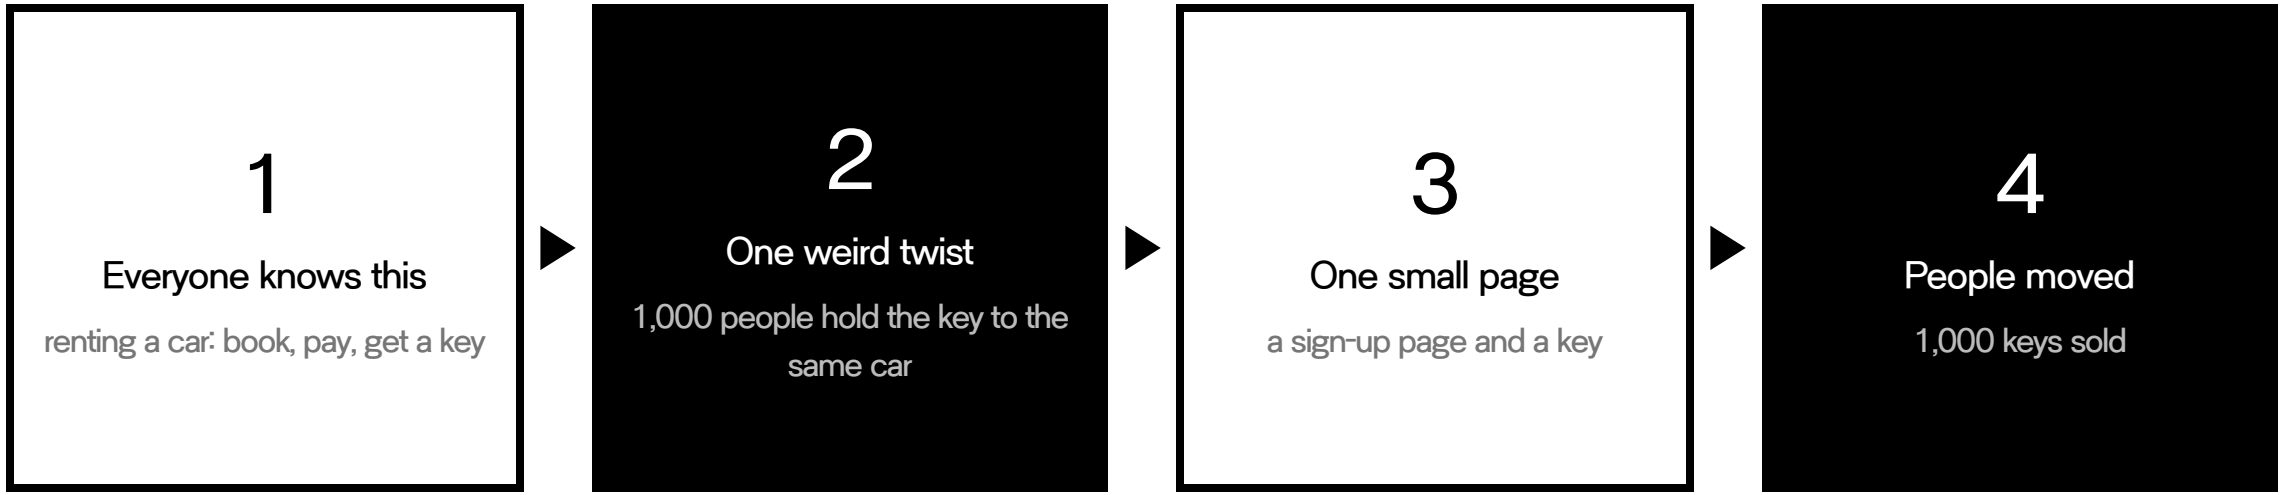

September 2022 · New York · 1,000 keys · one car

Anyone with a key **can drive the car**.

You find it, you drive it. Another key holder can **take it from you**.

Renting a car became a game of who finds it first

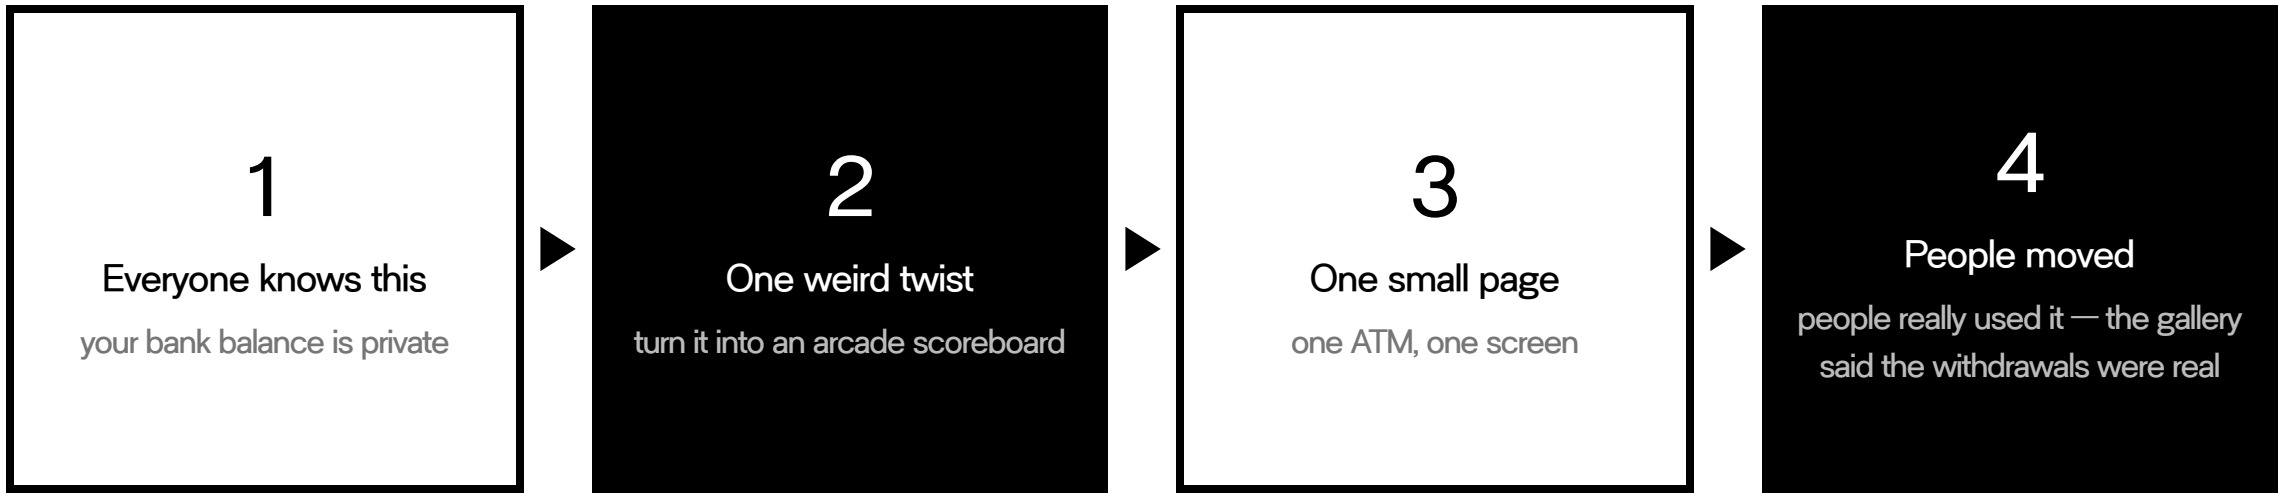

Art Basel, Miami Beach · 2022 · a working ATM

It takes **your photo** and shows **your bank balance** on a big screen.

It ranks people like an **arcade high-score board**.

A scoreboard for money.

Private money became a public game

Different drops. Same four boxes.

	1 · Everyone knows	2 · Weird twist	3 · Small	4 · People moved
Times Newer Roman	a page rule	a wider font	a font file	downloads
Key4All	renting a car	1,000 keys, one car	a sign-up page	1,000 keys sold
ATM	private money	a scoreboard	one machine	people at the screen

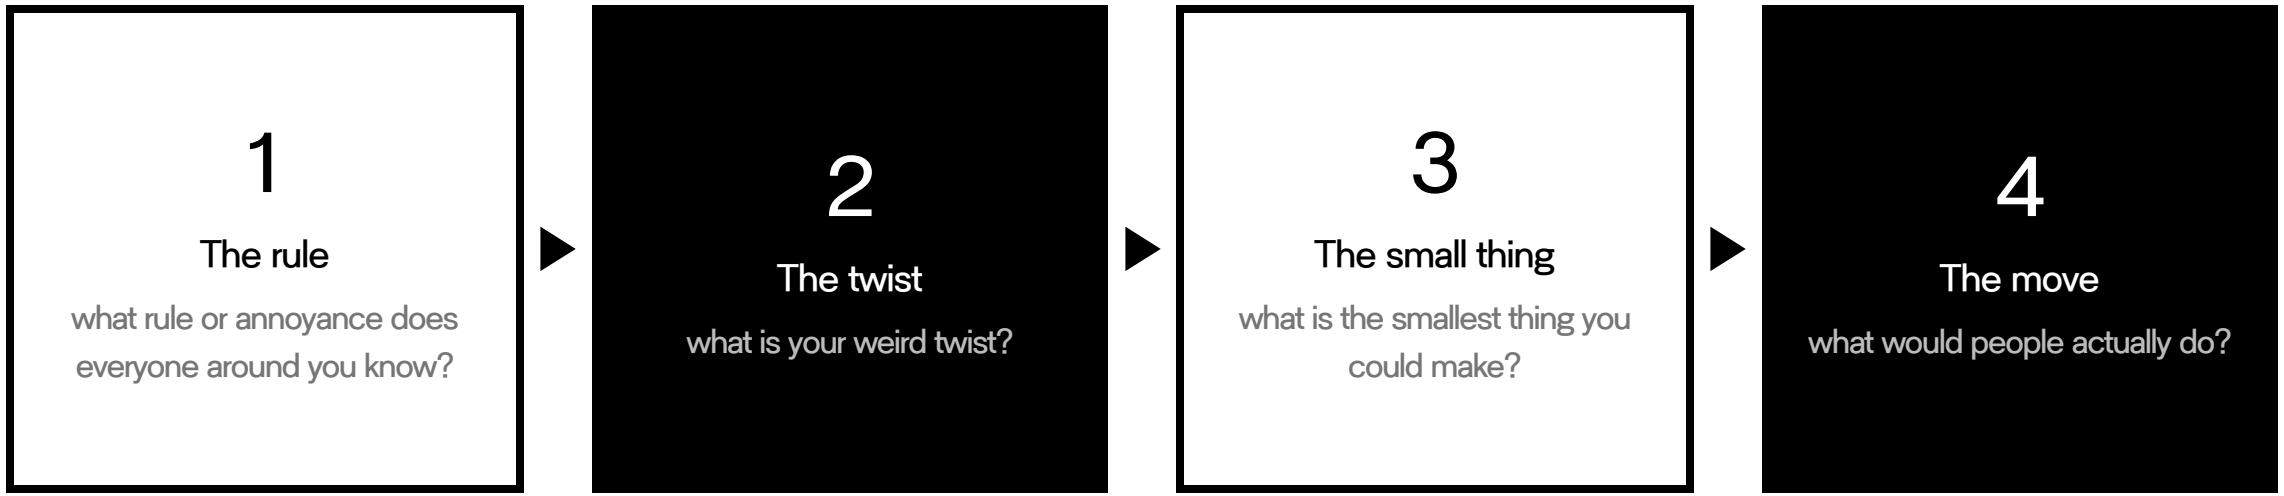

They start from a rule. They are small. People do something.

Rule — pages, rental cars, bank balances: a rule everyone knows and nobody questions.

Small — a font file, a sign-up page, one machine. Small enough to finish in a week.

Move — not just “ha ha”. They download. They buy a key. They step up to the machine.

One idea of your own, in four questions

Your own idea. Not a group's.

Pick a road. Start with a real scene: when, where, who.

A

Twist the business idea you already have

make it fun, not boring

B

Or something you really want to make

forget the semester project for a moment

C

Or: what if you did it in Korea?

what rule would you flip here?

It is a senior planner. You decide.

Scan. Open **Week 9**.

Sign in with your student ID and email.

Say hi. It will build the idea with you.

Say “summarize” when you want your page. Say yes to submit.

18:00
deadline — today, Oct 28

late
after 18:00 it is recorded as late

again
fix it and submit again in the same chat

Your idea is used in next week's activity.
